

IT'S GOT

TO BE QUIET!

With today's high-speed gear requirements come new problems... noise and vibration. To meet the industry's tough standards on tolerances and finishes, Niagara uses new grinding wheel technologies and all electronic Reishauer gear grinders. Noise and vibration are reduced!

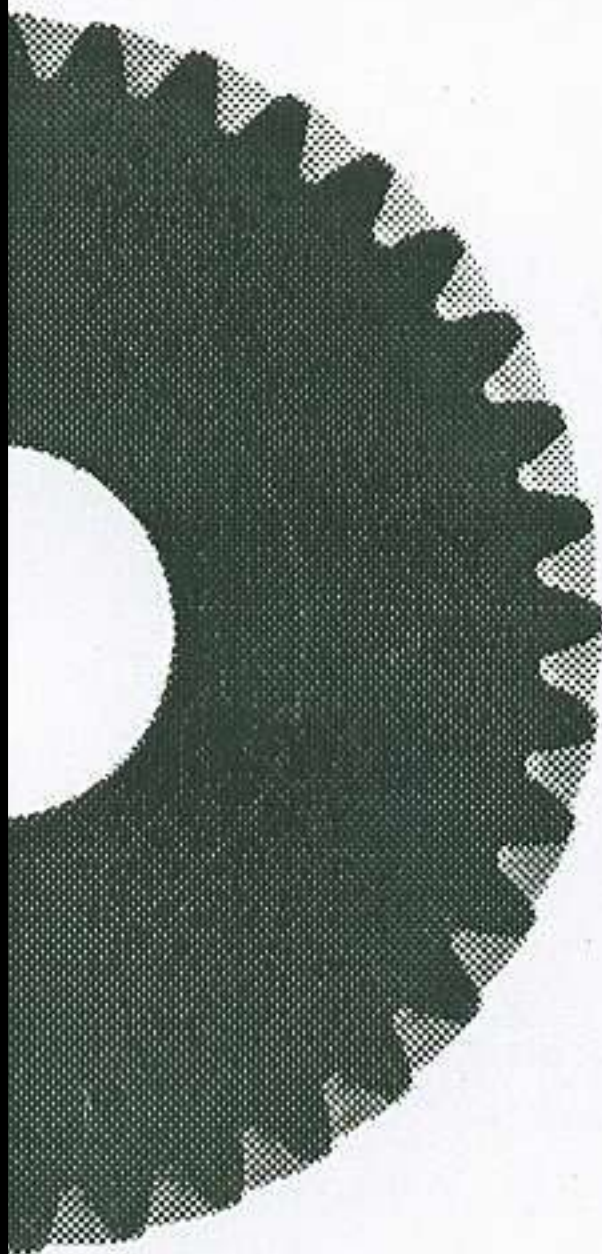

A contract manufacturer of ground spur and helical gears to AGMA Class 15, Niagara is your source to meet today's demanding new close-tolerance gear specifications. Let us quote on your next ground gear requirement.

Ground Gear Specialists

GEAR DESIGN PROBLEMS?

Your gear drive must be lighter, smaller, faster, cost less, carry more, last longer, and be quiet. And with tighter specs, conventional gear manufacturing methods just don't cut it.

Hardened and Reishauer ground gears by Niagara are your solution.

A contract manufacturer of ground spur and helical gears to AGMA Class 15, Niagara is your source to meet today's demanding new close-tolerance gear specifications. Let us quote on your next ground gear requirement.
